

# Expert training on Images Voice Data Networks

ETR400LRT Did@VDI++

Winners of  
the 15th Worlddidac Award 2012

## **Self-operating laboratory to deploy VDI convergence, for experts**

### MAIN CHARACTERISTICS

- Central cabinet :
  - SIP, RTP Voice server, HTTP, FTP Data ; Image/Video : IGMP, RTSP ...,,
  - Service control LCD Interface,
- Student development workstation :
  - Voice : Basic architecture, user function configuration & installation, voice menus & mails,
  - Data : SSH et FTP server configuration & installation, HTTP, MySQL & PHP web server installation,, POP3 & SMTP courier server installation,
  - Image & Video : IPTV service installation & configuration with STB or HTPC customer, video surveillance, etc...
  - Network : configuration & segmentation level 2 & 3 (switch, router, Wifi) etc...

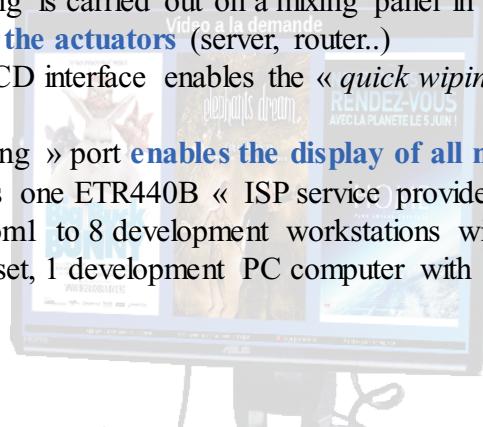

### AREAS OF APPLICATION

- Training on IP telephone display, IP television transmission,
- Technical colleges & Universities specialized in Telecommunication Network,

The **ETR400LRT Did@VDI++** is a self-operating laboratory, **it is fully isolated from the Internet network**. This specific characteristic enhances four main advantages :

- Mistakes made by the Students **would not cause any damage on the School network**,
- As the Laboratory is completely isolated from outside, only the Teacher has an access to the selection of videos & images available on the HTTP& FTP server, **this eliminates all risks of intrusion into sensible sites**,
- Network wiring is carried out on a mixing panel in order to **protect the mechanical parts (connectors) of the actuators** (server, router..)
- One single LCD interface enables the « *quick wiping* » of HTTP/FTP service exchange files,
- One « Mirroring » port **enables the display of all network exchanges**.

The Laboratory includes one ETR440B « ISP service provider ». It is constituted of one set of equipment including from 1 to 8 development workstations with : 1 cabinet with server, router, switch & STB, 1 videophone set, 1 development PC computer with Linux.

### **ETR440B, « ISP » set for Did@VDI++ self-operating laboratory, including :**

#### **ETR440000, 12 Units DATA PROCESSING CABINET :**

- Table-top or wall-mounted metal structure,
- Mixing panel with UTP, USB, HDMI crossbars,
- 2 U drawers,
- Electrical panel with differential circuit-breaker.

#### **2 x Cisco\*\* Switch 8 LAN ports :**

- 8 LAN ports 10/100/1000 Mbps RJ45
- Manageable
- IGMP Snooping compatible,
- Configuration backup & restoring

#### **1 x Cisco Router \*\* 8 LAN ports, 1 WAN port, Wifi :**

- 4 LAN ports 10/100 Mbps RJ45
- 1 WAN port, 1 Gbs, SPI firewall,
- IGMP Snooping compatible,
- WIFI bridge
- IP addressing : DHCP (customer & server)
- Configuration backup & restoring

## ETR440B, « ISP » set for Did@VDI++ self-operating laboratory :

### ETR441000, Did@VDI+ SERVER :

#### Hardware functions :

- Core2 uATX MB system board, 1xLAN, 3 x SATA, 2xDDR2
- Intel Dual Core Pentium E5700 CPU 3.0GHz 2M 65W
- 1U Active Blower w/Heatsink, 4GB DDR2 RAM 32bit PCI Flexible Riser Card for 1Unit
- Mini-1Unit Rack with Power Supply, DD 2"1/2 60GO SSD extractable, LCD display keyboard.

#### Software functions :

Linux working system with a set of free programs «[Astérisk\\*\\*](#), [Apache\\*\\*](#), etc...» for Voice, Data & Images service preconfigured, it ensures the following functions :

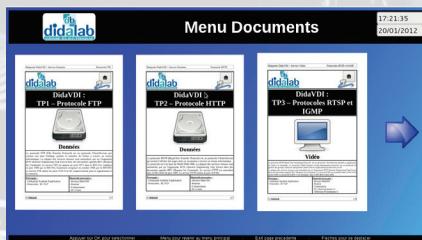

| Voice Service   | DataService                         | Images (Video) Service               | Server:   |
|---|-------------------------------------|--------------------------------------|---|
| <b>SIP account :</b><br>➤ On,<br>➤ Off,<br>➤ State of registers | ➤ HTTP : On/Off,<br>➤ FTP : On/Off, | ➤ RTSP : On/Off,<br>➤ IGMP : On/Off, | ➤ Network inf., service state,<br>➤ All services off,<br>➤ Reset exchange file,<br>➤ Server start & stop. |

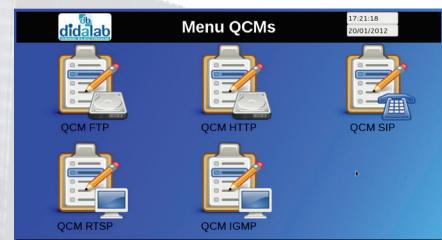

#### Some examples of services provided by Did@VDI++ :

Video pattern of 8 channels, duration: 1h30 each.

Set of Practicals downloaded from the server.

Training activities & MCQ with self-corrections & automatic assessments.

## ETR370B, Set-Top-Box / Television set :

- Complete set enabling the study of the Video operation on « VOD » (Video On Demand) :
- Set-Top Box, IP/HDMI transcoder with remote control,
- 21.5" HD screen, built-in loud-speakers with HDMI input,
- HDMI leads, Power Supply.

## **ETR450B Did@VDI++ & network architecture development workstation :**

### **ETR450000, 6 Units Data processing cabinet :**

- Table-top or wall-mounting metal structure,
- Mixing panel with UTP, USB, HDMI crossbars,
- 2 U drawer,
- Electrical panel with differential circuit-breaker.

### **1 x Cisco\*\* Switch 8 LAN ports :**

- 8 LAN ports 10/100/1000 Mbps RJ45,
- Manageable,
- IGMP Snooping compatible,
- Configuration backup & restoring.

### **1 x Cisco\*\* Router 4 LAN ports, 1 WAN port, Wifi :**

- 4 LAN ports 10/100/1000 Mbps RJ45,
- 1 WAN port, SPI fire break,
- IGMP Snooping compatible,
- WIFI bridge,
- IP addressing : DHCP (customer & server)
- Configuration backup & restoring.

### **ETR441B Set-Top-Box :**

- Complet set enabling the study of the Video operation on « VOD » (Video On Demand),
- Set-Top Box with remote control, IP/HDMI transcoder.

**ETR450B, Did@VDI++ development workstation & network architecture, following :**

## ETR451000, Did@VDI+ SERVER, student :

### **Hardware functions :**

- Core2 µATX MB 1xGLAN, 4xSATA,  
2\*DDR3, 3 USB,
  - Intel Dual Core Pentium E5700 CPU 3.0GHz  
2M 65W,
  - 1U Active Blower w/Heatsink, 4GB DDR3  
RAM, mechanical DD 500 GO,
  - The main board connection is on the side ,  
this particularity facilitates the wiring.

### **Software functions :**

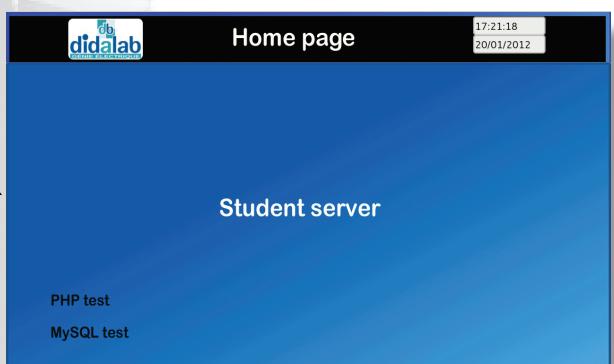

**Linux** working system with a set of preconfigured free programs : SSH Server, FTP server, HTTP server, IPBX server, Video-surveillance server, IPTV Server ...

Example of a welcome screen for student server available on HTML.

## Example of PHP development

**ETR360000 : Vesa Mini PC computer** Linux provided with Open Office, Quad-Core 1.5 GHz /2.3 GHz turbo, 1 LAN, Hard disk 500 GB, Ram 4 GB DDR4, Socket Mini PCI, external Mains Power Supply provided, Audio/video peripherals control programs installed.

Free programs installed :

- **Nmap\*\*** : State of TCP & UDP services.
- **FTP Customer \*\*** : FTP control lines file transfer,
- **FileZilla\*\*** : FTP file transfer through graphic interface
- **Iceweasel\*\*** : Internet explorer,
- **Ekiga\*\*** : PC program telephone,
- **Ngrep\*\*** : TCP UDP packets analysis,
- **VLC\*\*** : Multimedia reader,
- **Wireshark\*\*** : Network protocol analysis,

External connection : 2 USB, SPDIF, , HDMI, VGA, DC-IN, Jack.

**21,5 inches LCD screen**, 1680x1050 full HD, HDMI input, loud-speakers, built-in Webcam.

**Keyboard, mouse,**

**Audio-phonic micro headphone,**

### **ETR350B, Pack « IP Telephony, videoconference » :**

**ETR350000 : Videoconference telephone**

- LCD 4,3 inches color screen, CMOS 1,3 mega pixels video camera, codec video H.264, H.263 compatible,
- Control of 6 SIP direct lines, 2 Ethernet RJ45 ports, 10 / 100 Mbps, Wifi connection,
- Six-customers conference, hand-free Full Duplex with echo withdrawal,
- Broadbandsound, Son large bande, 3,5 mm headphone jack,
- 1 USB 2.0 port + SD / MMC & SDHC card reader, HDMI output,
- Lift-free line connection, call number & name display,
- Off-image, call transfer, do not disturb, hold, double call.

# LRT Manuals of practicals, topics :

Did@VDI++ laboratory is accompanied by a rich educational file. Indeed a very large number of documents are provided, technical files, reference manual and ten manuals of practical works. Topics are progressive, exploring the convergence VDI, VoIP settings by Digium GUI service, creation by command line, etc ..

PWs provided totaled 280 hours of practical works in pairs or 2,240 hours for laboratory 8 student pairs. See the list below, check all the details on our website : <http://didalab.fr>

| Désignations, (2011 ISCED level)                                     | PWs         | Désignations, (2011 ISCED level)                                      | PWs         |
